# STROODLES ECO-TABLEWARE

*Change made easy*

## Kai, Stroodlers!

Here at Stroodles HQ, we work hard to ensure that even the littlest change makes a difference in protecting our environment! We are not just a company, we are a movement! To help reduce the plastic wastage in our oceans we've partnered with Clean Ocean Sailing to make a change and #MakeASplash!

WelKome to Stroodles, nice to meet you! We are a company dedicated to producing 100% biodegradable products that benefit our planet. You might have seen our stuff out in the shops; ; we make edible cups, plates, spoons and, of course, our magnificent pasta straws! With Stroodles there's no need to compromise your dining or drinking experience, our products are 100% edible and perfect for getting you started on the road to ridding our world of one-use plastic.

We believe change can be easy and fun, if you just take it one Stroodle at a time...

*WelKome to  
Stroodles*

Did you know that there are an estimated 5.25 trillion pieces of plastic waste in our oceans with a staggering 8.3 billion straws adding to that total!

Plastic damages our oceans, lakes and rivers by harming the wildlife and releasing toxic gasses into the water. Birds, fish and other marine animals suffer greatly at the hand of plastic, from digesting poisonous materials to getting trapped in nets. We have the oppotunity to change that by significantly reducing our plastic usage but that doesn't mean that we have to go without!

You can still enjoy your morning apple juice, or perhaps a nice glass of milk before bed by simply switching to a Stroodles straw. We all want to do our bit for the planet, so by doing your research and making little changes you will be supporting our world-wide environmental campaign and help us Make A Splash!

# Your task today:

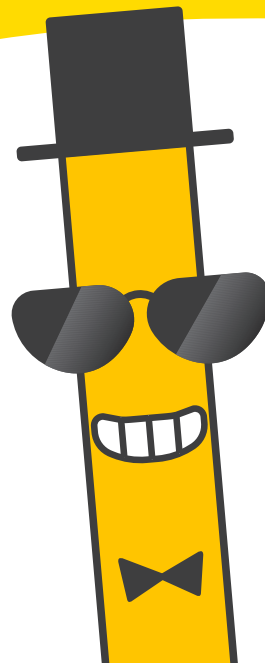

Today, we have a very important task for our Stroodlers! We have partnered with Clean Ocean Sailing, a local Cornish voluntary organisation that is dedicated to raising awareness about ocean plastic pollution. They will be venturing to the Isles of Scilly to continue their ever-so important work, but they need your help!

Recently, Clean Ocean Sailing have restored their sailing boat, Annette in order to carry out their mission however she could do with a new sail! We're calling on you, our Stroodlers, to design a brand-new sail for Annette!

**Use your creativity and passion for happy, healthy oceans to create the perfect design for the new sail. Think outside the box – what patterns will you use? What colour palette? What message are you trying to send?**

**Scan here for the brief given by our very own Founder and Chief, Mr Stroodles!**

# Competition RuleZ and Design Specifications:

Your design must be portrait

- The background colour for the sail will be black (don't worry about drawing this – we'll add it in later!)
- The bigger the design, the better! It's going to be seen by ships Zuper far away so it'll need to stand out!
- Submit your design on an A4 piece of paper and avoid important details on the borders as these will be cropped when fitting to the sail!
- If the winning design is submitted hand-drawn on paper, we will work with you and a designer to create a digital version of your artwork!

**The competition is open to all ages and all design capabilities, so what are you waiting for?**

Submit your designs at: [stroodles.co.uk/saildesigncompetition](https://stroodles.co.uk/saildesigncompetition) by 11:59pm on the December 31st 2021 to be in with a chance of seeing your creation come to life!
